

# A- Direct Access Glass Ltd.

We're #1 at 1753 Dolphin Ave. Kelowna BC

*the products you desire...*

*the quality you deserve.*

## ***Shower doors and mirrors***

- Your mirrors have been manufactured to the highest standards of quality and carry a one year warranty against manufacturers defects covering materials and labor. To clean, use regular window cleaner with no abrasive compounds and soft paper towel or cloth. For better quality glass cleaner come see us to see what we use!
- Your shower doors are manufactured by Agalite Bath Enclosures and have a lifetime warranty covering glass and hardware, with the exception of 10mm enclosures, which have lifetime on glass and three years on hardware. (freight charges may apply) Labor warranty will be one year from date of installation.
- Here are a few tips to help you care for and clean your Agalite shower door or tub enclosure to keep it looking new. Overall, using a squeegee for a minute after each shower helps keep spots and scale from accumulating on glass components. A combination of regular cleaning and squeegeeing will help keep your glass door clean and clear. What does this mean to you? It is our assurance that your bath will be the ultimate expression of elegance, style and quality for years to come. Use a non abrasive cleaner without bleach and never use steel or teflon scouring pads or bristle brushes. For showerguard coated glass see [www.showerguardglass.com](http://www.showerguardglass.com) for cleaning tips and warranty information

***Enjoy your new products!***

## **Note to frameless shower enclosure owners:**

Your shower enclosure has been installed to the highest of standards. Frameless shower enclosures are prone to possible breakage or leakage due to a variety of reasons. A Direct Access Glass accepts no responsibility for damage due to either breakage or leakage

## **A Note About Water Protection**

**There is a saying in the industry, 'a shower door is not an aquarium'. Further, different models of shower doors provide different levels of water protection. Proper design and installation plays a large roll in achieving proper functioning. While we install all products to provide a high level of water protection and offer accessories to enhance protection for smaller enclosures or high water pressure/volume situations, there is always a possibility of water exiting the enclosure. Besides providing anti-slip protection, bath mats are a common solution if minor issues exist.**

**A Direct Access Glass is not responsible for water damage outside the enclosure. Nor is A Direct Access Glass responsible for water exiting the shower around the door area. If required, additional seals can be provided after use, but will be at the owner or contractor's expense. If we were instructed to install the fixed panel(s) without perimeter silicone there will be a charge to seal that if it is required.**

## **Suggestion for use:**

- **Do not point or splash substantial water towards the glass**
